

Automotive Strategic Analysis Report (2019-2023)

1. Executive Summary

This strategic report analyzes vehicle sales performance (ICE vs EV) during periods of economic instability from 2019 to 2023. It aims to provide insights into market resilience and operational excellence.

2. Methodology

Data was synthesized monthly over a 5-year period. Economic crisis variables were introduced in 2020 and 2023 to measure the sensitivity of different vehicle segments.

3. Visual Analysis

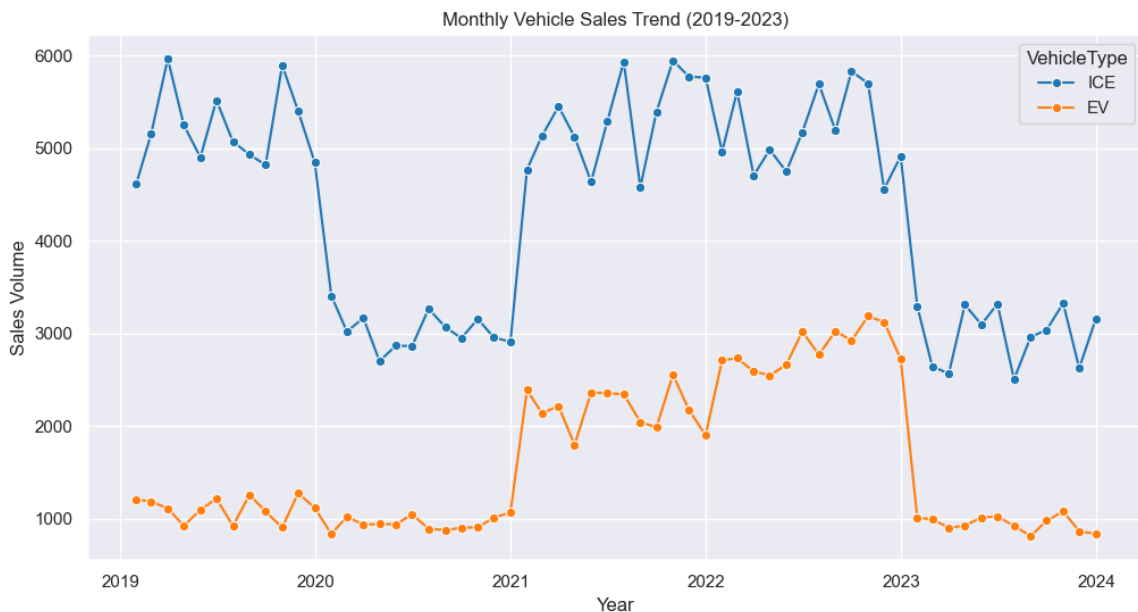

Figure 1: Comparison of monthly sales trends for ICE and EV models.

Automotive Strategic Analysis Report (2019-2023)

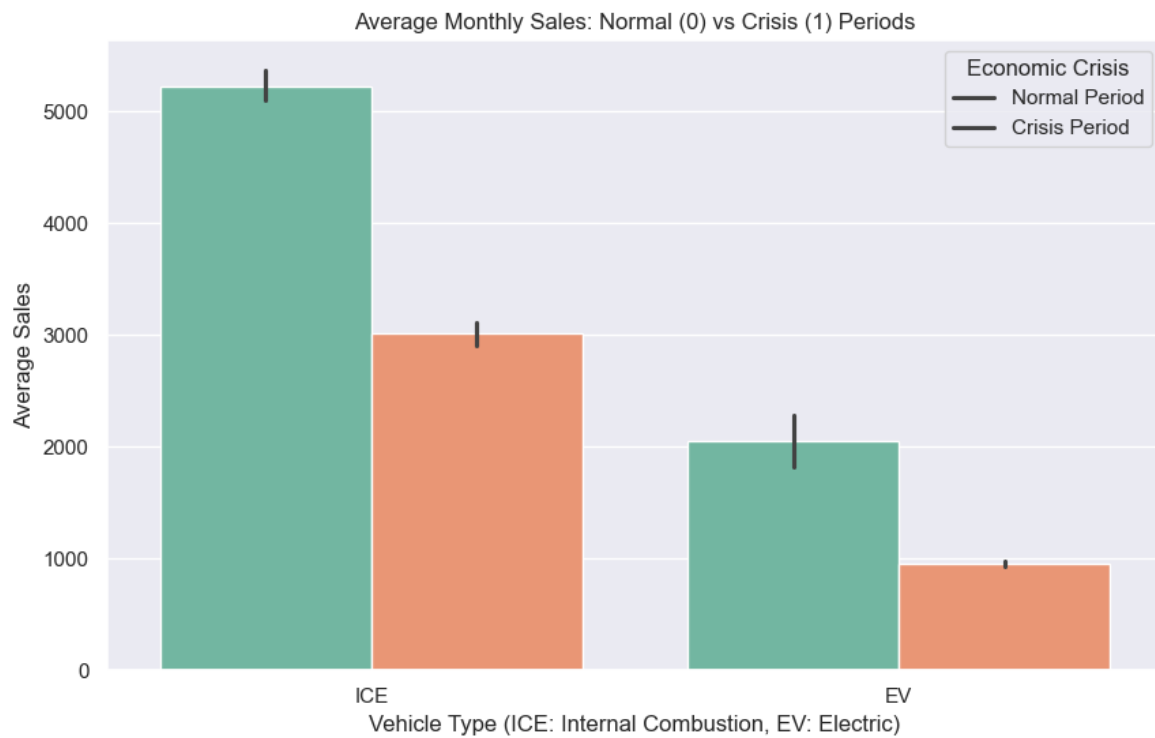

Figure 2: Performance breakdown during normal vs. crisis economic periods.

4. Strategic Recommendations

1. Prioritize EV infrastructure investment due to proven market resilience.
2. Implement AI-driven predictive modeling for risk management.
3. Focus on sustainable growth to mitigate future economic shocks.
