

Organizational Network Analysis (ONA) Strategic Report

This report identifies the informal leaders within the digital workplace. By mapping interactions, we can detect 'Opinion Leaders' who drive culture and 'Bridges' who connect isolated departments. This is a core component of our DBA strategy for humanizing digital work environments.

Strategic Recommendations:

- Empower identified influencers to lead digital transitions.
- Support isolated nodes at the network periphery to prevent burnout.
- Monitor 'Bridge' employees as key assets for innovation flow.
