

SpaceX Flight Analysis Report

1. Introduction

This report presents an analysis of rocket landing success factors based on a simulation model of Falcon 9 flight data.

2. Methodology

A synthetic dataset of 100 flights was generated to study variables including Payload Mass, Orbit Type, and Landing Outcomes.

3. Visual Analysis

Figure 1: Landing success distribution across different orbits.

SpaceX Flight Analysis Report

Figure 2: Statistical distribution of payload mass.

4. Conclusion

Initial analysis indicates that orbit type is a significant factor in landing success, while payload mass requires further predictive modeling.
